PERFORMANCE

Arc Performance

- 300 amps @ 60% duty cycle. Welds with up to 7/32" (5.6 mm) Fleetweld® 5P+ cellulosic and Excalibur® low hydrogen electrode.
- Pure DC generator welding arc is preferred by pipeliners and contractors for precise control of the arc in demanding code applications.
- Custom Arc® — Kubota® model includes 150 RPM High Idle (OCV) Adjustment Range — enhanced fine tuning for performance on pipe.
- All copper windings enhance arc stability for that really smooth high performance arc.
- Arc Gouging with up to 3/16" carbons.

Generator Performance

- 3,000 total watts of AC power from a 115V or 230V duplex receptacle for power tools and lights.
- Circuit breaker protection. 115V AC 20 amp output will operate up to a 9" grinder.
- Weather-protected receptacle covers.
- GFCI (Ground Fault Circuit Interrupter) 115V AC receptacles are standard for added safety.

FEATURES

- Choice of two industrial 4-cylinder, smooth-running, water-cooled diesel engines:
 - Perkins® 404D-22
98.1 dB sound power (Lwa) at rated load.
 - Kubota® V2203M
99.9 dB sound power (Lwa) at rated load.
- Gauges indicate oil pressure, engine temperature and battery charging amps.
- Engine hour meter to track scheduled maintenance.
- 15 gallons (57 ltrs) fuel capacity to work an extended day without refueling.
- Oil drain valve and tube are standard.
- Optional K924-5 Remote Control Kit for stick welding (for Classic® 300D codes 10911 and higher). Includes Remote Box and 100 ft. cable. Make fine current adjustments up to 100 ft. from the machine.

Dial In The Right Arc, Right Now.

Use the High Idle (OCV) engine speed adjustment dial to change the heat input to the arc:

- Set the arc in the machine's "sweet spot".
- Dial in a softer or more digging arc.
- Reduce root pass internal undercut, especially on X60 and X70 pipe.
- Stack iron faster with low heat and a clear puddle on fill passes.
- Avoid arc breaks. Avoid slag that crowds the arc.
- Control fusion on the cap pass with good puddle size and clarity.

(Available on Kubota® model only.)

- Optional Wire Feed Module for CV-wire welding. Increases productivity and reduces welding costs. Recommended wire feeders include LN-25 PRO or LN-15 Across-the-Arc models. Module has 14-pin connector for Lincoln wire feeders that use a control cable with 115V AC input: LN-25, LN-23P, LN-7, LN-7 GMA and LN-8. Built-in contactor for "cold-tip" electrode. (When CV wire welding with optional Wire Feed Module, idler may need to be set to "high" position for low current processes.)
- Optional K2464-1 remote control kit for stick and wire welding. For machines that have the Wire Feed Module installed. Make output adjustments up to 100 ft. from the machine.
- Compact size for installation on truck beds.
- Optional road trailer system is available:
 - K2636-1 Trailer
 - K2639-1 Fender & Light Kit
 - K2640-1 Cable Storage Rack

"After our Local 375 school participated in the evaluation of Lincoln Electric's Classic® 300D, the company generously donated the machine to our facility. As an apprentice program for the Plumbers & Pipefitters Union, we are grateful for the opportunity to use such a high quality piece of equipment. We especially benefit from the Pure DC generator because it produces a superior arc. This characteristic is ideal in pipe welding, therefore, the Classic® 300D allows us to provide our students with exemplary models for their education."
